What is Pivot?

Leader Guide

Pivot

Pivot's approach:

Pivot empowers students

Educators are provided with a unique opportunity to prove and improve their practice by harnessing student voice and agency in their classrooms and schools.
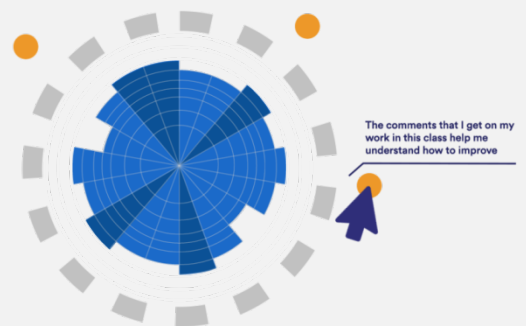

Pivot empowers teachers

It provides evidence-based tools and resources for individual teachers to help them improve their practice the very next day. Teachers can work individually or together - within cohorts, across domains or sub-schools. Inquiry cycles and action teams are directly supported to work towards shared goals.

Pivot empowers everyone in your learning community

We put powerful data and timely insights in your hands - supporting students, teachers, school leaders and system leaders. With customisable login views, tailored question sets, frameworks and rubrics, Pivot provides the right insights for the right people, at the right time.

What is Pivot?

- A short, targeted Student Perception Survey on Teaching Effectiveness that can be customised to fit your school's needs.

- A platform with tools for goal-setting, observations, professional learning.

- Coaching around survey results to ensure that data is complementary to current data sources and able to be actioned.

- A platform for student voice and agency within schools and across school networks.

The comments that I get on my work in this class help me understand how to improve

Implementing Pivot:

- School leaders work with Pivot coach staff to create an implementation plan for the year.

- Survey cycles are set up through our spreadsheet upload page; it takes less than 30 minutes.

- Students complete a short, 10 minute survey, normally twice a year.

- All responses to surveys are anonymous to protect the identity of students.

- Teachers and school leaders receive confidential reports as soon as each survey cycle ends.

- Pivot coaches work with school leaders to review results and identify a plan of action at the cohort, domain and whole school level.

- Teachers share their feedback with their students and colleagues to create action plans on how to improve the students' experience.
